

Outdoor Chalk Paint

Materials

- 2 cups Cornstarch
- 2 cups Water
- Food Coloring, misc. colors
- 8 small plastic cups
- Paintbrushes

Instructions

1. In a mixing bowl, combine the water and cornstarch and stir until the cornstarch dissolves and it is smooth. It will be kind of runny.
2. Divide the mixture evenly into the small plastic cups. Use the food coloring to make a different color paint in each cup.
3. Use paintbrushes to paint pictures on the sidewalk or driveway outside. The mixture is thinner and runnier than regular paint, but just paint your pictures like you would with any other paint.
4. The paint dries quickly, and it will resemble sidewalk chalk. The colors are very bright once they dry! It washes off very easily with rain or the hose.

How to Play Hopscotch

1. Draw a traditional hopscotch diagram like the one to the right below. (Chalk is best for asphalt and pavement outdoors. If you're playing inside, use masking or painter's tape.)
2. Throw a small stone, twig, beanbag, or other marker into the first square. (If it lands on a line, or outside the square, you lose your turn. Pass the marker to the following player and wait for your next turn.)
3. Hop on one foot into the first empty square, and then every subsequent empty square. Be sure to skip the one your marker is on.
4. At the pairs (4-5 and 7-8), jump with both feet.
5. At 10, hop with both feet, turn around, and head back toward the start.
6. When you reach the marked square again, pick up the marker -- still on one foot! -- and complete the course.
7. If you finished without any mistakes, pass the marker to the next player. On your next turn, throw the marker to the next number.
8. If you fall, jump outside the lines, or miss a square or the marker, you lose your turn and must repeat the same number on your next turn. Whoever reaches 10 first, wins.
